DETAILED ACTION

Response to Amendment

1. This Office Action is in response to the amendment filed January 8, 2008. Claims 1, 30 and 47 have been amended. Claims 19 and 20 were previously withdrawn. Claims 1, 4, 5, 7, 9, 13-18, 21-33 and 45-49 are pending and are rejected for the reasons given below.

Claim Objections

2. The objection of claim 30 is withdrawn in light of the amendment.

Claim Rejections - 35 USC § 112

3. The 35 U.S.C. 112 second paragraph rejections of claims 47-49 are withdrawn in light of Applicant's arguments.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1, 4, 5, 7, 9, 13-18, 21-33 and 45-49 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The value of n, as found in the formula of claim 1, cannot be less than two since for values of n less than two the molecule could not be cyclic. Additionally, it appears from the specification that Applicant does not have support for values of n less than 4 (see Examples 1-3). Thus, if

the claim was amended to include values of n less than 4, the amendment would add new matter. Support for values of n up to 100 is also found in the specification (see originally filed claims, [0009], [0027]).

Response to Arguments

6. Applicant's arguments, see Remarks, filed January 8, 2008, with respect to the Miura et al. Patent (US 6, 858,351) have been fully considered and are persuasive. The rejection of the claims has been withdrawn. The cyclic compound of Miura et al. contains a hydrogen atom where Applicant's compound contains an alkyl or aryl group. Additionally, the side chains of Miura et al. are used for cross linking.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thornton*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1, 30 and 47-49 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 11, 12 and 23 of copending Application No. 10/663,023. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of Application No. 10/663,023 require one or more siloxane polymers, and anticipate those disclosed in the instantly claimed invention. Copending claims 1, 11, 12 and 23 contain all the limitations of the instant claims 1, 30 and 47-49 and thus anticipate the instant claims.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
